Evidence-based performance measures for efficient and effective global health service delivery

SPOTLIGHT: ABORTION SERVICE QUALITY INITIATIVE UPDATE

Metrics for Management, Ibis Reproductive Health, and Ipas have completed Year 1 of the Abortion Service Quality project, and kicked off Year 2 with an in-person Resource Group meeting in Vancouver following Women Deliver. Key accomplishments from the first year include: 1) completion of a comprehensive literature review; 2) formative qualitative research; 3) alignment and consolidation of indicators; and 4) indicator reduction and outcome mapping.

Project partners have synthesized feedback from Resource Group members to develop the list of indicators and outcomes that will be used for Year 2 field testing in Africa and Asia. Following field testing, partners will analyze results to arrive at a final, abbreviated list of abortion service quality indicators. Final results will be shared in late 2020.

EQUITY TOOL UPDATES

Updated DHIS2 Compatibility

Our technical team recently completed a file update to ensure compatibility of the EquityTool with DHIS2 versions 2.28 through 2.32. All new EquityTools will include this compatibility, and any previous EquityTools will be made compatible upon request.
New EquityTool in Jordan

The EquityTool is now available in Jordan. This newest addition to the EquityToolbox is sourced from the 2016-2017 DHS, and consists of 14 single-variable questions. Start using the tool with your Jordanian clients and survey respondents today.

M4M BOARD UPDATES

Welcoming: Dr. Lynn Sibley

We are pleased to welcome new member Lynn Sibley to the Metrics for Management Board of Directors. Professor emerita Dr. Sibley is a certified Nurse Midwife and Medical Anthropologist, with a more than 20 year career at Emory University. She has focused on advancing midwifery education and improving care delivery and health outcomes for mothers and newborns around the world. During her career, Dr. Sibley has developed and tested community-based strategies to reduce maternal and newborn morbidity in developing countries.

New Board President: Dr. Bill Savedoff

Metrics for Management is honored to announce that William Savedoff has accepted the position of Board President. Dr. Savedoff recently started a new role as the Principle Health Specialist at the Inter-American Development Bank. He was formerly a Senior Fellow at the Center For Global Development where he worked on issues of aid effectiveness and health policy. Before joining the center, Savedoff prepared, coordinated, and advised development projects in Latin America, Africa and Asia for the Inter-American Development Bank and The World Health Organization.
